Pondok Pesantren Darul Falah menggunakan Microsoft Word dan Microsoft Excel dalam mengelola data santri, data guru dan staff, sehingga data akademik dan pendaftaran santri baru disimpan dan dicatat secara berkala dan berkesinambungan dengan penambahan data baru secara terus menerus. Sehingga proses ini memakan waktu lama dan menjadi kurang efisien dengan hasil pengolahan data pendaftaran dan nilai santri hanya dapat dilihat santri dan orang tua pada rekap nilai akhir semester. Dengan demikian dibangun sistem informasi akademik pondok pesantren darul falah berbasis web mobile yang berfungsi sebagai sistem tata kelola pendaftaran santri baru dan nilai akademik santri yang terintegrasi dengan santri, orangtua, guru dan staff admin. Berdasarkan uji coba sistem informasi akademik menghasilkan sistem yang dapat melakukan tata kelola pendaftaran santri baru sehingga akan diproses oleh staff pendaftaran yang terintergrasi dengan sistem akademik santri untuk melakukan tata kelola nilai akademik santri oleh guru dan staff sehingga nilai santri dapat dipantau secara *up to date* oleh orangtua dan santri.

Kata Kunci: Sistem Informasi, Sistem Akademik, Sistem Pendaftaran, Santri.

ABSTRACT

DARUL FALAH ISLAMIC BOARDING SCHOOL ACADEMIC INFORMATION SYSTEM BASED ON MOBILE WEB

Darul Falah Islamic Boarding School uses Microsoft Word and Microsoft Excel in managing student data, teacher and staff data, so that academic data and registration of new students are stored and recorded regularly and continuously with the addition of new data continuously. So that this process takes a long time and becomes less efficient with the results of processing registration data and student scores that can only be seen by students and parents at the end of the semester recap of grades. Thus, a mobile web-based Darul Falah Islamic boarding school academic information system was built which functions as a management system for new student registration and student academic values that is integrated with students, parents, teachers and admin staff. Based on the trial of the academic information system, it produces a system that can manage the registration of new students so that it will be processed by the registration staff which is integrated with the academic system of students to manage the academic values of students by teachers and staff so that students' scores can be monitored up to date by parents. and students.

Key Words: Information System, Academic System, Registration System, Santri.
