Oppy Berliana L. I.

SOEs is seen as an inefficient business entity because it is wasteful in the use of resources with corruption and has low profitability. SOEs play a significant role and influence the performance of the national economy, so they need to be managed effectively and efficiently in accordance with the principles of good corporate governance. This study aims to prove the effect of good corporate governance on the performance of state-owned companies. This research is a type of quantitative research. The data in this study are secondary data obtained from various government institutions, the Indonesia Stock Exchange and other supporting media. The results of this study indicate that the independent board of commissioners has a significant positive effect on the company's performance, the audit committee and audit quality have no effect on the company's performance.

Keywords: independent commissioner, audit committee, audit quality, company performance
