ABSTRACT

This research aimed to determine whether attitude, the *personal cost of reporting*, the seriousness level of fraud, and organizational commitment affect *whistleblowing intention*. The research was conducted at BPKP Bandar Lampung using attitude, the *personal cost of reporting*, the seriousness level of fraud, and organizational commitment as independent variables and *whistleblowing intention* as the dependent variable. The research design was quantitative research with primary data obtained from questionnaires that were distributed to BPKP Bandar Lampung auditors. Respondents with a sample of 41 employees employed the *purposive sampling method*.

The research results indicated that attitude had no positive and significant effect on *whistleblowing intention*; *personal cost of reporting* had a positive and significant effect on *whistleblowing intention*; seriousness level of fraud had a positive and significant effect on *whistleblowing intention*; organizational commitment had no positive and significant effect on *whistleblowing intention*.

Keywords: Attitude, *Personal Cost of Reporting*, Seriousness Level of Fraud, Organizational Commitment
