The purpose of the study was to examine the effect of Integrity, Internal Control, and Leadership on Performance Accountability. The population of this study was the employees of the local government of Bandar Lampung City. The sample of this study consisted of structural officials/employees involved in the Organization of Bandar Lampung City Regional Devices, sampling in this study using a purposive sampling technique. This study used a quantitative approach. The data used were primary data collected through questionnaire distribution. This research was conducted using multiple linear regression analysis using SPSS software version 23. The result of this study showed that integrity and internal control had a positive effect on performance accountability, while leadership did not have a positive effect on performance accountability.

Keywords: Integrity, Internal Control, Leadership, Performance Accountability.
