The objective of this study is to examine the impact of Leverage, Profitability, Tangibility, and Investment Opportunities on the capital structure. The study utilises a quantitative research strategy, specifically employing a causal associative technique. The population comprises of Transportation and Logistics companies that are publicly listed on the Indonesia Stock Exchange (IDX). The researchers employed the purposive sampling method to carefully pick a sample of 15 non-financial Transportation & Logistics organisations. The study of the data was performed utilising panel data analysis techniques. The findings of the study indicate that Investment Opportunities exert a statistically significant and favourable impact on capital structure.

**Keywords:** Leverage, Profitability, Tangibility, Investment Opportunities, Capital Structure.
