The purpose of the study was to empirically prove the effect of the characteristics of Good Corporate Governance on the disclosure of Enterprise Risk Management in manufacturing companies listed on the Indonesia Stock Exchange (IDX). In this research, there were three independent variables tested: Independent Board of Commissioners, Size of the Board of Commissioners, and Audit Committee. The population of this study consisted of manufacturing companies from 2020 to 2022. The sampling technique used was purposive sampling, resulting in a sample of 106 companies. The research was conducted from 2020 to 2022, yielding a total of 318 data points. The analysis method employed was multiple linear regression using SPSS V.25. The result of the study showed that the variables of the Independent Board of Commissioners and the Size of the Board of Commissioners had a significant effect on the disclosure of Enterprise Risk Management. In contrast, the Audit Committee variable did not have a significant effect on the disclosure of Enterprise Risk Management.

Keywords: *Independent Board of Commissioners, Size of the Board of Commissioners, Audit Committee, Disclosure of Enterprise Risk Management*
