

ACKNOWLEDGEMENT

With gratitude to Allah swt. I managed to finish my thesis well and without any obstacles, the thesis that I did myself was correct. but of course it can not be separated from the support of his beloved family.

First of all, I want to say a big thank you to my parents, Mr. Purwanto and Mrs. Tulistiani, who have been trying and praying for me so that I can finish my studies on time.

Thank you to the supervisors, both within the scope of the IibDarmajaya campus and the supervisors from the University of Malaysia Perlis (UniMaP) who have patiently guided me until I successfully completed my thesis.

Thank you to Wahyu Agus Setiawan for accompanying me in carrying out my education, participating in providing encouragement and even listening to complaints during my education.

Thank you to my comrades in arms, for participating in helping to provide valuable motivation at the end of education.

So this is made so that it can be a reference in the future for better things, because if Allah takes you on a journey then he will help you to get through it.
