This research aimed to analyze the influence of green marketing and electronic word of mouth on purchase decisions for Avoskin Beauty products, with brand image as intervening variable in Bandar Lampung. A quantitative approach was used in this research, with data collection of questionnaires using purposive sampling to 160 respondents. Those respondents were Avoskin Beauty users in Bandar Lampung who had been using the products for at least three months and were active on Avoskin's social media platforms. Then the data were analyzed using path analysis with SPSS 27 software. The findings showed that both green marketing and electronic word of mouth had a direct effect on purchase decisions. Both factors influenced brand image so that it significantly influenced purchase decisions. Meanwhile, brand image as intervening variable strongly influenced the relationship between green marketing and purchase decisions, with an indirect effect value of 0.412 which was greater than the direct effect of -0.217. Conversely, brand image had a weak influence on the relationship between electronic word of mouth and purchase decisions, with an indirect effect of 0.074 which was smaller than the direct effect of 0.798. To sum up, with or without brand image as intervening variable did not significantly influence the relationship between electronic word of mouth and purchase decisions.
