The use of a contract monitoring system is expected to meet the needs of parties related to the contract monitoring process of goods at PT. Bukit Asam Tbk. Unit Pelabuhan Tarahan. So that the existence of information system technology will assist in efforts to improve services and solve problems in PT. Bukit Asam Tbk. Unit Pelabuhan Tarahan. Given the increasing number of goods contracts that continue to grow every day and to keep abreast of information technology developments and to make it easier to provide information on contract monitoring of goods at PT. Bukit Asam Tbk. Unit Pelabuhan Tarahan needs a program that can facilitate the monitoring of goods contracts, so that it can provide more accurate data.

Key words: monitoring, information systems, data processing systems.
