Currently, the evolution of technology and communication from time to time is growing rapidly, especially in the field of computer technology that drives the use and exploitation of these technologies in a wide range of fields and aspects of life, One example of the use and use of computer technology itself is in the field of wonder. In practice all this time in psychology, most of them still use old ways and methods in the process of understanding and learning the psychological side of an object. The object that we're talking about here is a human being with every attitude and behavior. One of the old methods that is still used in psychology is to make leaves -- the cohesion sheets or a series of questions that are going to be asked to the objects to be studied, and then the cohesion-cohesion sheets are filled in by each object, The coefficient is then regrouped and filled in so that a conclusion can be drawn from the sum of those values. This requires a system of experts capable of dealing with issues that will facilitate decision-making in relation to school behaviour or personality. Privileges and Privacy are very important for SMP students, both individually and in groups, to be independent and to develop optimally, through various types of service and support activities according to the norms that apply.
