The purpose of this study was to determine empirically the effect of independent boards of commissioners, audit committee boards, managerial ownership, environmental performance, and profitability on firm value. This study used a sample of listed mining sector companies on the Indonesia Stock Exchange and PROPER participants in 2015 - 2018. This study was conducted using descriptive statistics, classical assumption tests, and multiple linear regression with a 95% confidence level. The result of this study showed that the independent commissioner, audit committee, environmental performance, profitability had an effect on firm value. Meanwhile, managerial ownership had no effect on firm value.
