ABSTRACT

The purpose of this study was to obtain empirical evidence regarding the effect of Firm Size, Profitability, Asset Structure, Likuidity, and Sales Growth on the Capital Structure on listed manufacturing companies on Indonesia Stock Exchange in 2015-2018. The population in this study are manufacturing companies on Indonesia Stock Exchange in 2015-2018. The sampling technique used Purposive Sampling. Therefore, the sample of 57 manufacturing companies with a total of 228 research observations. The method of analysis used a multiple linear regression method. The results of this test prove that Firm Size, Asset Structure and Sales Growth did not affect the Capital Structure. Whereas Profitability and Likuidity affected the Capital Structure

Keywords: Capital Structure, Firm Size, Profitability, Asset Structure, Likuidity, Sales Growth.
