

CHAPTER 5

Conclusions And Future Works

5.1 Conclusion

Based on the results and discussion of the Android-based Aqiqah animal sales marketplace software system for micro, small and medium enterprises (MSMEs), it is concluded that:

- a. This application is built using android platform technology, so it can be run on any brand of smartphone that is already based on android.
- b. This application can help Castamer carry out his obligations as Muslims in the implementation of aqiqah at the level of micro, small and medium enterprises
- c. This application can be an alternative to searching for aqiqah animals for the people of Bandar Lampung

5.2 Saran

This research is basic in nature and is not yet at the perfect stage of the entire work process, which is to become a platform that is able to help the community in the search for aqiqah provider. After evaluating the report, the author realizes that there are still many shortcomings in the development of this system, for that the author hopes that this application can be further developed with some development suggestions as follows:

- a. In this application, you can develop applications with the iOS and Windows Phone operating systems.
- b. In this application there are still many shortcomings to be perfect c. In this application, it can be developed by adding virtual transactions which previously used the manual method, in order to facilitate transactions.
- d. In this application can be developed more interesting with notifications using email or phone number.
- e. This application does not have a chat room with the Admin for the sake of direct.
