**ABSTRACT**

This study was to examine the effect of female board of commissioners and female board of directors on firm value. The data used in this research is secondary data. The sampling technique uses Purposeive Sampling with a sample of 400 manufacturing companies listed on the Indonesia Stock Exchange in 2018-2020. The data analysis method used was multiple linear regression using SPSS version 21 software. The results showed that the female board of directors had no effect on firm value, while female board of commissioners had no effect on firm value.

**Keywords :** Female Board of Directors, Female Board of Commissioners, Firm Value.
